5. Additional Information. (Space will expand to fit your text.)

Project photos of the completed stormwater detention basin have been attached.

6. Summary of Project Challenges. (Space will expand to fit your text.)

The footprint of the original concept design needed to be modified due to the presence of wetlands that were field identified. However, the design of the basin was modified to provide a similar level of performance in terms of pollutant reduction efficiency. Construction bids for the project came in at \$141,746, which slightly exceeded the estimated construction cost in the grant application of \$128,400. The actual engineering, planning and administration costs for the project was \$40,900, which exceeded the estimated amount in the grant application of \$30,000. The total project cost, including construction change orders was \$184,502 which exceeded the total estimated project cost in the grant application of \$158,400.
